1. System Overview

KosAI is a cloud-based field service management platform designed for CCTV, networking, WiFi, and NAS infrastructure companies. It connects office administrators, field technicians, and customers through a unified system.

User Roles

ROLE	ACCESS	LOGIN METHOD
Admin	Full system access — all modules	Username + Password or Google Sign-In
Technician	Mobile app — jobs, checklist, history, settings	Employee ID (TECH-xxx) + PIN
Sales	Limited admin — clients and jobs	Employee ID + PIN
Client	Portal — service history, warranty, invoices	Client ID lookup

Access Points

PLATFORM	URL	PURPOSE
Admin Console	admin.html	Office management dashboard
Technician App	app.html	Field operations (mobile-first)
Client Portal	portal.html	Customer self-service
Landing Page	index.html	Public marketing site
Desktop App	.exe (Tauri)	Offline-capable Windows application

2. Getting Started

First-Time Admin Login

- 1 Open `admin.html` in your browser (or launch the desktop app)
- 2 Click "**Sign In**" on the lock screen
- 3 Enter your **Username** and **Password**
- 4 Click "**Sign In**"

Default Admin Account

Username: `admin` | Password: *(set during initial setup)*. If you forgot your password, use [System Settings > Database Restore](#) from a backup.

First-Time Technician Login

- 1 Open `app.html` on your phone (or use the PWA install prompt)
- 2 Enter your **Employee ID** (e.g., `TECH-001`) and **PIN** (default: `1234`)
- 3 Tap "**Sign In**"

Changing Your PIN (Technician)

- 1 Go to **Settings** tab in the mobile app
- 2 Tap "**Change PIN**"
- 3 Enter your current PIN, then your new PIN twice
- 4 Tap "**Update PIN**"

3. Admin Dashboard

The dashboard is your **Command Center** — the first screen you see after login.

Key Metrics

Charts & Visuals

- **Job Status Distribution** — Pie chart of Pending / In Progress / Completed / Cancelled
- **Weekly Activity** — Bar chart of jobs created per day
- **Revenue Trend** — Line chart of income over time

Quick Actions

- **Create Job** — Opens the ticket creation form
- **Add Customer** — Opens the client registration form
- **Run Backup** — Downloads a JSON backup of the entire database
- **View Reports** — Jumps to the Reports module

Auto-Refresh

The dashboard refreshes data every 10 seconds automatically. You'll see live updates without page reload.

4. Service Tickets & Job Dispatch

ADMIN Module: [Dashboard > Service Tickets](#)

This is the core module for creating, managing, and dispatching field service jobs.

Creating a New Job

- 1 Click **"Create Job"** or **"+"** button
- 2 Fill in: Client, Service Type, Technician, Priority, Description, Scheduled Date
- 3 Click **"Create"**

Job Status Flow

Job Card Fields

FIELD	DESCRIPTION
Job ID	Auto-generated (e.g., JOB-1001)
Client	Company or individual name
Service Type	CCTV / Networking / WiFi / NAS / General
Technician	Assigned field worker
Status	Current job state
Priority	Low, Medium, High, Urgent
Checklist	Service checklist progress
Before/After Photo	Site photos
Notes	Technician field notes

5. Dispatch Map

ADMIN Module: [Dashboard](#) > [Dispatch Map](#)

An interactive Leaflet.js map showing real-time technician locations.

Features

- **Technician Markers** — Each technician appears as a colored marker on the map
- **Click a Marker** — Shows technician name, current status, and assigned job
- **GPS Tracking** — Technicians share location when they clock in
- **HQ Marker** — Your head office location is always shown
- **Dark Mode** — Map tiles automatically adjust to dark/light theme

HQ Configuration

- 1 Go to **System Settings**
- 2 Scroll to "**Head Office Location**"
- 3 Enter your office name, Google Maps URL, coordinates, and address
- 4 Click "**Save**"

6. Site Surveys & Quotations

ADMIN Module: [Dashboard](#) > [Surveys](#)

Survey Pipeline

Creating a Survey

- 1 Click "**New Survey**"
- 2 Select Client, Site Address, Survey Type, add Notes
- 3 Click "**Create**"

Adding Site Photos

Photo types: [server_room](#) , [cable_path](#) , [power_source](#) , [camera_fov](#) , [exterior](#) , [general](#)

Generating a Quotation

- 1 Complete the survey (mark as "**Completed**")
- 2 Click "**Generate Quotation**" — AI estimates BOM, cable lengths, labor, software
- 3 Review and edit line items
- 4 Click "**Create Quotation**"

Quotation Workflow

- 5 Click "**Send to Client**" — portal link generated, sent via Telegram
- 6 Client views, approves with digital signature, or rejects
- 7 Convert approved quotation to **Job** or **Invoice**

7. Customer Management (AMC)

ADMIN Module: Dashboard > Customers

Client Types

TYPE	DESCRIPTION
Corporate	Business clients with AMC contracts
Individual	One-time residential customers

AMC Status

STATUS	MEANING
ACTIVE	AMC contract is current and paid
Inactive	Contract exists but not currently active
EXPIRED	Contract has passed its renewal date
No AMC	Client has no maintenance contract
Individual	One-time service customer

8. Attendance & Time Tracking

ADMIN

TECHNICIAN

How Clock-In Works (Technician)

- 1
- Open the mobile app
- 2
- Tap the
- green clock icon**
- in the header bar
- 3
- Tap "
- Clock In**
- " — GPS coordinates are recorded

Attendance via Telegram

COMMAND	ACTION
<code>/checkin</code>	Clock in for today
<code>/checkout</code>	Clock out
<code>/status</code>	Check current clock-in status
<code>/report</code>	Weekly attendance summary
<code>/team</code>	See who is currently clocked in
<code>/leaderboard</code>	Weekly hours leaderboard
<code>/history</code>	My clock-in/out history this week

9. Inventory & Stock Management

ADMIN Module: [Dashboard](#) > [Stock & Items](#)

Three Sub-Modules

MODULE	PURPOSE
Stock Batches	View imported batches, expand to see serial numbers
Sales Pricing	Price matrix with quick-edit, USD/MMK dual pricing
Device Catalog	Hardware SKU registration, categories, brands

Adding a Stock Batch

- 1 Go to **Stock Batches**, click "**Import Batch**"
- 2 Enter Batch Code, Device Model, Buying Price, Supplier
- 3 Paste serial numbers (one per line, supports barcode scanner)
- 4 Click "**Create Batch**"

Serial Number Status

STATUS	MEANING
ACTIVE	In stock and available
Sold	Sold or assigned to a job
RMA	Returned to distributor

10. POS Terminal & Invoicing

ADMIN Module: [Dashboard](#) > [POS Terminal](#)

Terminal Checkout Workflow

- 1 Select items from inventory dropdown (shows stock, price, warranty)
- 2 Set quantity, click **"Add to Cart"**
- 3 Review cart — items show name, qty, unit price, line total
- 4 Click **"Checkout"** — invoice created ([INV-xxx](#)), payment recorded

Outstanding Credits

View and manage unpaid invoices: client name, amount owed, days outstanding, **"Mark as Paid"** button, **"Save to Google Drive"** for PDF backup.

11. Cash Ledger

ADMIN Module: [Dashboard](#) > [Cash Ledger](#)

Track all cash flow — deposits, withdrawals, and running balance in dual currency (USD/MMK).

Making a Deposit

- 1 Click "**Deposit**"
- 2 Enter amount (USD or MMK) and description
- 3 Click "**Confirm**"

12. Warranty & RMA

ADMIN Module: [Dashboard](#) > [Warranty & RMA](#)

N

ACTIVE WARRANTIES

N

EXPIRED

N

OPEN RMA

N

RMA COMPLETED

Registering a Warranty

- 1 Click "**Register Warranty**"
- 2 Enter Serial Number, Device Name, Client, Installed Date, Warranty Months
- 3 Click "**Register**"

Raising an RMA Claim

- 1 Click "**Raise RMA Claim**"
- 2 Select serial number, enter distributor, RMA tracking ID, date sent
- 3 Click "**Submit**"

13. Distributors

ADMIN Module: [Dashboard > Distributors](#)

Manage hardware suppliers and procurement channels. Each distributor has: Name, Contact Person, Phone, Email, Product Lines. Linked to inventory batches and RMA claims.

14. Service Fees

ADMIN Module: [Dashboard > Service Fees](#)

Manage the catalog of service charges. Categories: CCTV Installation, Network Setup, WiFi Configuration, NAS Setup, General Maintenance, Emergency Repair, Consultation. Linked to the job dispatch form for auto-population.

15. Reports & Analytics

ADMIN Module: Dashboard > Reports

Report Types

REPORT	CONTENT
Technician Performance Audit	Completion rates, active tickets, workload per engineer
Customer Service Audit	Ticket history, AMC status, revenue per client
Job History Ledger	Job types, technicians, dates, statuses in audit grid

Timeframe Scopes

SCOPE	DESCRIPTION
This Month / Last Month	Calendar month
This Year / Last Year	Calendar year
Last 30 Days / Last 90 Days	Rolling window
All-Time	Every record in the system

16. AI Copilot

ADMIN Module: [Dashboard](#) > [AI Copilot](#)

Three Tools

A. Chat with Data

Ask natural language questions about your business data. Examples:

- "How many jobs were completed this month?"
- "Which technician has the highest completion rate?"
- "What is our total revenue this quarter?"

B. Auto-Dispatcher

AI matches technicians to jobs based on skills, workload, proximity, and past performance. Select a job > click "**Auto-Assign**" > review suggestion > "**Confirm**".

C. Route Optimizer

Select multiple jobs > click "**Optimize Route**" > view optimal visit sequence on the map.

17. User Management

ADMIN Module: [Dashboard > User Management](#)

ROLE	PERMISSIONS
Admin	Full access to all modules, settings, and reports
Technician	Mobile app — jobs, checklist, history, own profile
Sales	View clients and jobs, limited admin access

Each technician gets a **Digital ID Card** with: photo, name, role, employee ID, QR code, phone, active status, company details, emergency contact.

18. System Settings

ADMIN Module: [Dashboard > Settings](#)

SETTING	DESCRIPTION
Exchange Rate	USD to MMK conversion rate
HQ Location	Head office coordinates for dispatch map
Timezone	System timezone
Database Backup	Download/restore JSON backup

Database Restore Warning

This will erase all current data and replace it with the backup. Always create a backup before restoring. This action cannot be undone.

19. Landing Page Editor

ADMIN Edit the public marketing page without code changes.

Editable sections: Hero (eyebrow, headline, description, CTA), Services, Why Choose Us, Stats, Price List, CTA Banner, Footer. Changes are live immediately.

20. Portfolio

ADMIN Showcase completed projects on the public portfolio page.

Add projects with title, category, description, images. Filter by: CCTV, Networking, WiFi, NAS, General Maintenance. View live at </portfolio.html>.

21. Receipt Builder

ADMIN Design and generate PDF receipts for completed jobs.

Visual designer with live preview, jsPDF-based generation, customizable template with company logo and details.

22. Technician Mobile App

TECHNICIAN File: `app.html` — mobile-first Progressive Web App

Four Tabs

TAB	PURPOSE
Jobs	View assigned active/pending jobs, pull-to-refresh
Checklist	Active job form — checklist, photos, hardware picker, notes, signature
History	Completed jobs with before/after photos
Settings	Profile, digital ID card (3D flip), PIN change, theme toggle

Checklist Workflow

- 1 Complete service checklist items
- 2 Take **Before Photo** (site condition on arrival)
- 3 Select hardware used from inventory catalog
- 4 Add technician notes (AI polish available)
- 5 Get **customer digital signature**
- 6 Take **After Photo** (completed work)
- 7 Tap "**Submit Job**" — status changes to Completed

PWA Installation

- 1 Open `app.html` in Chrome/Safari
- 2 Tap "**Add to Home Screen**" (or use install prompt)
- 3 App appears as native icon, opens full-screen

Offline Support

The app works offline via Service Worker. Jobs and checklists are cached locally. Photos are queued for upload when reconnected. Tap Sync when back online.

23. Client Portal

CLIENT File: portal.html

How to Access

- 1 Open portal.html
- 2 Enter your Client ID (e.g., CLI-001)
- 3 Click "Pull Logs"

Available Sections

SECTION	CONTENT
AMC Panel	Contract status, start/end dates, days remaining
Warranty Panel	Active hardware warranties, expiry countdown
Billing Panel	Invoices, payments, outstanding balances, PDF export
Service Log	Paginated service records with before/after photos

24. Telegram Bot

ALL ROLES Webhook: `/api/telegram/webhook`

Commands

COMMAND	DESCRIPTION
<code>/start</code>	Welcome message
<code>/help</code>	Show all commands
<code>/clock</code>	Quick clock status
<code>/checkin</code>	Clock in for today
<code>/checkout</code>	Clock out
<code>/status</code>	Clock-in status & active jobs
<code>/report</code>	Weekly attendance summary
<code>/team</code>	Who is currently clocked in
<code>/leaderboard</code>	Weekly hours leaderboard
<code>/history</code>	My clock-in/out history
<code>/jobs</code>	List your active jobs
<code>/completed</code>	List your completed jobs
<code>/today</code>	Today's jobs & attendance
<code>/ticket JOB-xxx</code>	View job details
<code>/accept JOB-xxx</code>	Accept job assignment
<code>/assign JOB-xxx Tech</code>	Assign technician (admin)
<code>/cancel JOB-xxx</code>	Cancel a job (admin)

AI Voice & Photo Dispatch

- **Voice Message** — Transcribed by Gemini AI, auto-creates job with best technician match
- **Photo Message** — Uploaded to Google Drive, creates job with photo attached
- **Text Message** — Auto-creates job ticket from any text

25. Keyboard Shortcuts

SHORTCUT	ACTION
Ctrl + K	Focus search bar
Ctrl + N	Open New Ticket form
Escape	Close any open modal

26. Troubleshooting

ISSUE	SOLUTION
Cannot log in (Admin)	Verify credentials, check role is "Admin", try Google Sign-In
Cannot log in (Technician)	Use format TECH-xxx , default PIN 1234 , check account is Active
Photos not uploading	Check internet, verify Google Drive integration, check Telegram bot token
Jobs not appearing	Pull to refresh, verify correct account, check job assignment
Attendance not recording	Enable GPS/location, check internet, try Telegram as backup
AI Copilot not responding	Check GEMINI_API_KEY , verify quota, dual-gateway fallback active
Telegram bot silent	Verify bot token and chat ID, test with /start
Offline mode (Technician)	Jobs/checklists cached locally, photos queued, tap Sync when online

Quick Reference

Admin Daily Workflow

- 1 Morning:** Check dashboard metrics, review overnight jobs
- 2 Dispatch:** Assign new jobs to technicians
- 3 Monitor:** Watch the dispatch map for technician locations
- 4 Review:** Check completed jobs and photos
- 5 Finance:** Process POS sales, update cash ledger
- 6 Reports:** Generate end-of-day reports

Technician Daily Workflow

- 1 Clock In** — Tap the clock icon
- 2 Check Jobs** — View assigned jobs
- 3 Accept** — Tap a job and start working
- 4 Document** — Take before photos, fill checklist
- 5 Work** — Complete the service
- 6 Document** — Take after photos, add notes
- 7 Sign** — Get customer signature
- 8 Submit** — Mark job as completed
- 9 Clock Out** — End of day
